Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the (publisher, society); and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and informatrion in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA: Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of the U.S. Copyright Law, provided a fee is paid. This fee is US $ 0.20 per page, or a minimum of US $ 1.00 if an article contains fewer than five pages. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0175-7598, the volume, and the first and last page numbers of each articles copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Other regulations: Authors publishing in this journal can, under certain conditions, benefit from library and photocopy fees collected by VG WORT. Authors resident in the Federal Republic of Germany or in West Berlin can apply to Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestrasse 49, D-8000 München 2, for detailed information.

Contents

Biotechnology

P. Adlercreutz, B. Mattiasson: Oxygen supply to immobilized cells. 4. Use of p-benzoquinone as an oxygen substitute 296

K. D. Barrow, J. G. Collins, D. A. Leigh, P. L. Rogers, R. G. Warr: Sorbitol production by *Zymomonas mobilis* 225

I. Belič, E. Ghera, H. E. Gottlieb, A. Plemenitaš: Bioconversion of cyclohexene derivatives 310

H. Bettmann, H. J. Rehm: Degradation of phenol by polymer entrapped microorganisms 285

A. M. Breure, J. G. van Andel: Hydrolysis and acidogenic fermentation of a protein, gelatin, in an anaerobic continuous culture 40

A. J. Broderick, E. B. Sinclair: Microbial biomass production by continuous fermentation of bark hydrolysate 384

B. Brohan, A. J. McLoughlin: The behaviour of yeast flocs in hindered settling and fluidized bed regimes 10

B. Brohan, A. J. McLoughlin: Characterization of the physical properties of yeast flocs 16

M. Cantarella, C. Migliaresi, M. G. Tafuri, F. Alfani: Immobilization of yeast cells in hydroxyethylmethacrylate gels 233

C. B. Ching, Y. Y. Ho: Flow dynamics of immobilized enzyme reactors 303

P. Dhulster, J. N. Barbotin, D. Thomas: Culture and bioconversion use of plasmid-harboring strain of immobilized *E. coli* 87

H. Eikmeier, H. J. Rehm: Production of citric acid with immobilized *Aspergillus niger* 365

K. Furuhashi, M. Takagi: Optimization of a medium for the production of 1,2-epoxytetradecane by *Nocardia corallina* B-276 6

R. D. Gehle, K. Schügerl: Protein recovery by continuous flotation 133

M. L. F. Giuseppin: Effects of dissolved oxygen concentration on lipase production by *Rhizopus delemar* 161

S. E. Godtfredsen, A. M. Rasmussen, M. Ottesen, P. Rafn, N. Peitersen: Occurrence of α-acetolactate decarboxylases among lactic acid bacteria and their utilization for maturation of beer 23

A. Q. H. Habets-Crützen, L. E. S. Brink, C. G. van Ginkel, J. A. M. de Bont, J. Tramper: Production of epoxides from gaseous alkenes by resting-cell suspensions and immobilized cells of alkeneutilizing bacteria 245

A. Jaworski, L. Sedlaczek, J. Długoński: Transformation of steroids by fungal spores. III. Activity of the 11-hydroxylases at various times during germination and vegetative growth of *Cunninghamella elegans* sporangiospores 313

S. E. Jensen, D. W. S. Westlake, S. Wolfe: Production of penecillins and cephalosporins in an immobilized enzyme reactor 155

M. Johansson, J.-E. Sjöström: Ethanol and glycerol production under aerobic conditions by wild-type, respiratory-deficient mutants and a fusion product of *Saccharomyces cerevisiae* 105

E. Keller, F. Lingens: Synthesis of chorismic acid by immobilized cells of *Enterobacter aerogenes* 62-1 3

R. Kurane, T. Suzuki, S. Fukuoka: Purification and some properties of a phthalate ester hydrolyzing enzyme from *Nocardia erythropolis* 378

E. D. Lancy, O. H. Tuovinen: Ferrous ion oxidation by *Thiobacillus ferrooxidans* immobilized in calcium alginate 94

N. Madry, R. Zocher, K. Grodzki, H. Kleinkauf: Selective synthesis of depsipeptides by the immobilized multienzyme enniatin synthetase 83

C. H. Matei, M. J. Playne: Production of volatile fatty acids from bagasse by rumen bacteria 170

M. Matsumura, H. Märkl: Application of solvent extraction to ethanol fermentation 371

M. A. Mehaia, M. Cheryan: Ethanol production in a hollow fiber bioreactor using *Saccharomyces cerevisiae* 100

O. E. Molina, N. I. Perotti de Gálvez, C. I. Frigerio, P. R. Córdoba: Single cell protein production from bagasse pith pretreated with sodium hydroxide at room temperature 335

I. Nilsson, M. Dostálek: Estimation of the biofilm formation ability of *Pseudomonas putida* in discrete samples from continuous culture 183

P. Norregaard, H. Holm, C. Emborg: Organic acids and penicillin production 221

R. N. Okagbue, M. J. Lewis: Use of alfalfa residual juice as a substrate for propagation of the red yeast *Phaffia rhodozyma* 33

G. B. Patel: Ethanol production during D-xylose, L-arabinose, and D-ribose fermentation by *Bacteroides polypragmatus* 111

J. Pazlarová, M. A. Baig, J. Votruba: Kinetics of α-amylase production in a batch and fed-batch culture of *Bacillus subtilis* with caseinate as nitrogen source and starch as carbon source 331

E. Pertot, J. Čadež, S. Miličić, H. Sočič: The effect of citric acid concentration and pH on the submerged production of lysergic acid derivatives 29

J. Romero, P. Liras, J. F. Martin: Dissociation of cephamycin and clavulanic acid biosynthesis in *Streptomyces clavuligerus* 318

W. Scheiding, M. Thoma, A. Ross, K. Schügerl: Modelling of the enzymatic hydrolysis of cellobiose and cellulose by a complex enzyme mixture of *Trichoderma reesei* QM9414 176

L. Sedlaczek, J. Długoński, A. Jaworski: Transformation of steroids by fungal protoplasts 166

G. Sheir-Neiss, B. S. Montenecourt: Characterization of the secreted cellulases of *Trichoderma reesei* wild type and mutants during controlled fermentations 46

A. M. Sills, P. S. J. Zygora, G. G. Stewart: Characterization of *Schwanniomyces castellii* mutants with increased productivity of amylases 124

I. Umemura, S. Takamatsu, T. Sato, T. Tosa, I. Chibata: Improvement of production of L-aspartic acid using immobilized microbial cells 291

S. Vidmar, V. Turk, I. Kregar: Cellulolytic complex of *Aspergillus niger* under conditions for citric acid production. Isolation and characterization of two β-(1→4)-glucan hydrolases 326

L. Viikari: Formation of sorbitol by *Zymomonas mobilis* 118

P. Walczak, H. Oberman, R. C. Kirkwood, B. Kristiansen: Effect of phenoxyalkanoic acid herbicides on the fermentative production of L-lysine 129

N. Weber, H. Benning, H. K. Mangold: Production of complex ether glycerolipids from exogenous alkylglycerols by cell suspension cultures of rape 238

Industrial microbiology

J. Pellinen, E. Väisänen, M. Salkinoja-Salonen, G. Brunow: Utilization of dimeric lignin model compounds by mixed bacterial cultures 77

Applied microbiology

M. Beyer, H. Diekmann: The laminarinase system of *Streptomyces* sp. ATCC 11238 207
C. A. Boulton, C. Ratledge: *Cryptococcus terricolus,* an oleaginous yeast re-appraised 72
B. Brohan, A. J. McLoughlin: The influence of yeast metabolism on dispersion in a fluidised yeast bed 146
S. Y. Eguchi, H. Nakata, N. Nishio, S. Nagai: $NADP^+$ reduction by a methanogen using HCOOH or H_2 as electron donor 213
M. G. N. Hartmanis, T. Klason, S. Gatenbeck: Uptake and activation of acetate and butyrate in *Clostridium acetobutylicum* 66
L. Hortmann, H. J. Rehm: Inhibitory effect of undecanoic acid on the biosynthesis of long-chain fatty acids in *Mortierella isabellina* 139
I. Karube, N. Urano, H. Kanayama: Cloning and expression of *Citrobacter freundii* β-isopropylmalate dehydrogenase gene in both *Escherichia coli* and *Bacillus subtilis* 340
G. F. Leatham, T. J. Griffin: Adapting liquid spawn *Lentinus edodes* to oak wood 360
S. Long, D. T. Jones, D. R. Woods: Initiation of solvent production, clostridial stage and endospore formation in *Clostridium acetobutylicum* P262 256
Y. Malpiece, M.-L. Michel: Constitutive expression of the human fibroblast interferon gene is elicited in cultured mouse L cells by the long terminal repeat of Moloney sarcoma virus 189
S. Milićić, M. Kremser, Z. Povšič, H. Sočič: Growth and sporulation of the fungus *Claviceps purpurea* in batch fermentation 356
R. H. Müller, W. Babel: Clucose as an auxiliary substrate. The influence of its carbon catabolism on the maximum carbon conversion efficiency 195
J.-M. Nicaud, A. Breton, G. Younes, J. Guespin-Michel: Mutants of *Myxococcus xanthus* impaired in protein secretion: an approach to study of a secretory mechanism 344
J. Okada, H. Shimogaki, K. Murata, A. Kimura: Cloning of the gene responsible for the extracellular proteolytic activities of *Bacillus licheniformis* 406
S. Pažoutová, Z. Řeháček: Phosphate regulation of phosphatases in submerged cultures of *Claviceps purpurea* 129 producing clavine alkaloids 389
M. W. Platt, Y. Hadar, I. Chet: Fungal activities involved in lignocellulose degradation by *Pleurotus* 150
S. D. Rogers, G. Holt: Isolation and characterization of DNA repair deficient mutants from *Penicillium chrysogenum* 251
H. Sahm, K.-L. Schimz: Effect of N-methyl-1-deoxynojirimycin on the degradation of cellobiose by *Cellulomonas cartalyticum* 54
J. Sanchez, J. P. Guiraud, P. Galzy: A study of the polygalacturonase activity of several yeast strains isolated from cocoa 262
E. Schmidt, H.-J. Knackmuss: Production of cis,cismuconate from benzoate and 2-fluoro-cis,cis-muconate from 3-fluorobenzoate by 3-chlorobenzoate degrading bacteria 351
K. H. Tan, C. O. Gill: Effect of culture conditions on batch growth of *Saccharomycopsis lipolytica* on olive oil 201
G. Weenk, W. Olijve, W. Harder: Ketogluconate formation by *Gluconobacter* species 400
J. Wiegel, M. Dykstra: *Clostridium thermocellum:* Adhesion and sporulation while adhered to cellulose and hemicellulose 59
L. P. T. M. Zevenhuizen: Gel-forming capsular polysaccharide of fast-growing rhizobia: occurrence and rheological properties 393

Short contributions

M. Banerjee, A. Chakravarty, S. K. Majumdar: Characteristics of yeast β-galactosidase immobilized on calcium alginate gels 271
R. E. Burrell, W. E. Inniss, C. I. Mayfield: Development of an optimal heterotrophic growth medium for *Chlorella vulgaris* 281
N. Cleland, E. G. Hörnsten, H. Elwing, S.-O. Enfors, I. Lundström: Measurement of hydrogen evolution by oxygen-limited *E. coli* by means of a hydroge sensitive Pd-MOS sensor 268
F. Fatichenti, G. A. Farris, P. Deiana, P. Cabras, M. Meloni, F. M. Pirisi: The effect of *Saccharomyces cerevisiae* on concentration of dicarboxymide and acylanilide fungicides and pyrethroid insecticides during fermentation 419
M. K. Kalra, M. S. Sidhu, D. K. Sandhu, R. S. Sandhu: Production and regulation of cellulases in *Trichoderma harzianum* 427
D. Leigh, R. K. Scopes, P. L. Rogers: A proposed pathway for sorbitol production by *Zymomonas mobilis* 413
M. G. Lorenz, W. E. Krumbein: Large-scale determination of cyanobacterial susceptibility to antibiotics and inorganic ions 422
T. Nagai, Y. Kashiwagi, Y. Magae, T. Sasaki: Isolation of *Robillarda sp.* producting high β-1,4-glucan glucanohydrolase 275
A. Nowakowska-Waszczuk, E. Rubaj, B. Matusiak, E. Kosiek: The effect of acetate on the production of citric acid by *Aspergillus niger* in submerged fermentation 416
R. N. Okagbue, M. J. Lewis: Inhibition of the red yeast *Phaffia rhodozyma* by saponin 278
Y. Suzuki, S. Tamagawa: The lack of identity between *Bacillus stearothermophilus* and *Bacillus thermoglucosidasius* in serological patterns of exooligo-1,6-glucosidase and exo-α-1,4-glucosidase 218
